Each effect includes a number of ready-to-use presets that are also fully customizable to user's preference.

Version 17.0 provides the updated *Frame Packs Manager*. It is now possible to create custom frame packs. Also, the *Delete* button has been added.

The *Batch Processing* option has been enhanced. It is now possible to pre-specify custom file names: add a suffix to the initial file name or even assign another name (+ sequence number).

Also, the updated software provides support for more RAW files, some bug fixes, and stability improvements.
