

AKVIS Sketch 20.5: Turn Photos into Stunning Pencil Drawings!

June 27, 2018 – AKVIS announces Sketch 20.5, an award-winning program for conversion of photos into pencil sketches and watercolor paintings. Version 20.5 offers the Notification Panel, the Eyedropper tool, some tools improvements and fixed bugs.

AKVIS Sketch converts digital photos into unbelievably realistic pencil sketches and watercolor drawings - B&W or color. The software is both user-friendly and rich with possibility. There are two photo-to-sketch styles: *Classic* and *Artistic*, each with dozens of built-in presets to give you starter points and inspiration. You can either use the *Express* mode that is especially configured for ease of use for the customer or switch to the *Advanced* mode that enables full control over every aspect of the drawing.

Version 20.5 offers a number of enhancements and improvements:

The *Notification Panel* keeps users informed about the latest updates of Sketch. This is a handy and convenient way to make sure that the most up-to-date version of the software is installed.

The *Eyedropper Tool* now appears when selecting a color. The tool allows users to pick up a sample color from anywhere on the image.

Also, the new version offers some tools improvements, support for new RAW files, and minor bug fixes.
